

Hearing Wellness Centre

Windsor, Ontario, Canada - Completed in 2007

The Hearing Wellness Centre's new location in the South Walkerville Medical Centre in Windsor, Ontario is contained within a newly renovated 1,300 sq. ft. unit. The brightly lit waiting room with its warm and comforting colours and decor create an atmosphere not commonly found in medical offices. The eye catching curved front counter partially conceals the reception area behind. The remaining space of the unit is divided to provide office space, two exam rooms, a work room with storage space, sound testing room, staff room and washrooms. The curved forms are intended to replicate the shape of the ear and the capture of sound.
