

Holiday Inn Hotel Renovations

Windsor, Ontario, Canada - Completed in 2008

Passa Associates Architects was asked to modernizing the image of this existing hotel prior to its changing over to another operator, the Holiday Inn chain. Exterior revitalisation was accomplished through a fresh new colour scheme and various facade improvements such as full glass entry doors, canopies, full length exterior grilles and new materials adding to the major renovations completed for this client previously. In 1998 the brick building was updated with a new stucco facade with added parapets to provide a new image for a new operator at that time. The existing lobby, patron washrooms, indoor pool area and meeting rooms were modernized with contemporary finishes and furnishings while the existing dated restaurant was transformed into a new eatery and after hours lounge.
