

# L.A. Desmarais School Renovations

Windsor, Ontario, Canada - Completed in 2005

Passa Associates Architects designed the renovations for the L.A. Desmarais Catholic Elementary School which involved creating a new entrance and functional administrative office areas. A new aluminum entrance canopy and cross identifies the main entrance to the building while the enlarged entry hall with seating, display wall and partial raised ceilings provides a welcoming aspect from the tight confines previously.

The new general office area was created using 'found space' in an adjacent under-used locker room and the existing administrative offices were reorganized with new meeting rooms and the principal's office evolved into the new design.
