

Windsor Stadium

Windsor, Ontario, Canada - 2015, 2016

Passa Architects worked with the Alpha Kai Omega Fraternity Organization (AKO Fratmen) to lease the Windsor Stadium from the Greater Essex County District School Board and evolve it into a state-of-the-art new facility - The Windsor Stadium Sports and Culture Restoration Project. The plan included providing a new synthetic turf field and new precast concrete Stands for 4,100 seats with Change Rooms, Washrooms and Concessions under. Also included in the project was the total renovation to the existing stands with revised Washrooms, Concessions and a larger Press Box with a possible new Hall of Fame Addition. Covering the entire existing stands would be a solar panel roof to power the entire facility along with a new brick finish with banners and brick pier iron fencing to provide and entirely new image for the most storied sports stadium in the city.
