

Proposed Pelissier Street Garden - Windsor, ON

GREENING THE CITY for a Walkable Windsor

- Provide a green canopy of trees over paved areas to assist in street cooling
- Limited street parking (15 mins.) and provide drainable surface treatments throughout
- Plant out hard impervious surfaces as much as possible removing large sidewalk areas
- Construct large intensification pavement areas for pedestrian crosswalks to provide a stronger awareness for drivers that the urban environment is a pedestrian precinct
- Continue green aspects throughout the downtown encouraging green roofs, green walls, potted plants, water features, statues of civic importance and heavily treed and planted streets minimizing asphalt surfaces to visualize and experience windsor as a walkable garden city
- Create more urban parking structures with green roofs to remove most cars from the streets
- Utilize net zero street light fixtures with solar generation on shade canopies
