

Holiday Inn Express Re-Branding / Renovations

Windsor, Ontario, Canada - Completed 2017

Passa Architects were contracted by PCR Constructors Inc. of Windsor, Ontario to be the project architect designing the extensive renovation and re-branding of a former Travelodge Hotel in downtown Windsor into the new Holiday Inn Express. Passa Architects developed a modern, functional and accessible lower two storey's of the twelve storey hotel comprising mostly of the public areas by reorganizing the main entry and lobby, revising the access to the second floor, completely renovating the two-storey lounge / dining area with new glazing walls along the front front elevation of the building, updating of the washrooms, exercise area, pool, meeting rooms and staff areas all as portions of the scope of work. Exterior renovations aimed at modernizing and revitalizing the appearance of the building included revising existing curtainwall installations, adding a large new canopy over the revised new main entrance / vehicle drop off area, adding accent lighting to the exterior and painting the entire exterior facade of the building. The comprehensive and extensive renovation altered the existing building from a non-descript hotel into an attractive new entity in the downtown core of the city on its expansive waterfront.
